Culture: Learn language as it's truly spoken. We've designed our innovative curriculum through authentic materials (film, TV, music) for a truly global education.

Professionally-Trained Instructors: Experience expert instruction. We train extensively in language-learning science and stay up-to-date with EdTech tools for dynamic and interactive courses.

Conversation & Community:

All lessons are recorded. Depending on the subject and age of student, subjects may include a “lead” lesson (seminar) and an “explore” lesson. Students apply the knowledge they have learned through “apply” or homework assignments and are assessed regularly through summative and formative assessments.

Teachers use online break out rooms, chats, polls, quizzes as well as virtual simulations to encourage student interaction and foster engagement and understanding with the topic being discussed.
